MEMORANDUM

DATE: August 6, 1991
SUBJ: Cleaning Up CERCLIS Database
FROM: Nancy Smith
MA Site Assessment Manager
TO: File

In a continuing effort to improve the CERCLIS database, a review of Site Assessment information contained in the database is being performed. One focus of this review is to identify sites where the Actual Completion Dates for Site Discovery (DS), Preliminary Assessment (PA), Site Inspection (SI), Expanded Site Inspection (ESI) or Listing Site Inspection (LSI), and Hazard Ranking System scoring and NPL Proposal (HP) are not in chronological order.

(Typically, these events occur in succession, and therefore, the completion dates for each event follow in chronological order).

In cases where, for example, the date of Site Discovery in CERCLIS postdates the completion of the Preliminary Assessment, the Actual Completion Date for one or both of these activities may be revised to conform with a chronological Site Assessment process. Such revisions will only be made following a review of the information contained in the project file.

The changes to CERCLIS made for this site as a result of this effort include:

SI completion date changed from 8-1-84 to 9-1-84
